

Ayushman Sharma

Full Stack Developer

Ahmedabad, Gujarat - +91 82399 34935

sharmaayushmansharma@gmail.com - linkedin.com/in/ayushman-sharma-19b9392a8 - github.com/ayushmanji

PROFESSIONAL SUMMARY

Full Stack Developer skilled in building production-ready web applications with React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB, with hands-on experience integrating AI APIs (Google Gemini, Clipdrop) into real products. Comfortable owning a feature end-to-end: designing REST APIs, implementing JWT-based authentication, optimizing SQL and MongoDB queries, and shipping through Agile/Git workflows. Focused on writing clean, maintainable code and building interfaces that are fast, intuitive, and genuinely useful.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C++, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Framer Motion, Responsive Web Design
- **Backend:** Node.js, Express.js, REST API Design, JWT Authentication, Bcrypt, Middleware Design
- **Databases:** MongoDB (Mongoose, Aggregation Pipelines), MySQL
- **AI Integration:** Google Gemini API, Clipdrop API, ChatGPT, Claude, GitHub Copilot, Cursor
- **Tools & DevOps:** Git, GitHub, Docker, Postman, Cloudinary, Firebase, Render, Netlify
- **Practices:** Agile/Scrum, Code Review, Debugging, Testing, CI/CD Deployment
- **Currently Learning:** Azure, FastAPI, PostgreSQL, Redis

WORK EXPERIENCE

Software Developer

Jan 2026 - Present

Meditab India, On-site

- Build and maintain backend modules and REST APIs for production healthcare software, working across cross-functional teams.
- Optimize SQL queries and business logic to improve application performance and reliability.
- Implement authentication and integrate internal services to improve software stability.
- Debug and resolve production issues through root-cause analysis and structured testing.
- Contribute to sprint planning, code reviews, and release management in an Agile workflow.

Web Development Intern

May 2025 - Jul 2025

Unified Mentor, Remote

- Built full-stack web applications using React.js, Node.js, Express.js, MongoDB, and Firebase.
- Designed and integrated REST APIs for authentication, dashboards, and CRUD operations.
- Developed reusable frontend components, improving performance and maintainability.
- Collaborated in Agile teams using Git workflows, code reviews, and iterative delivery.

PROJECTS

Visionary.ai - Full-Stack Text-to-Image AI SaaS Platform

GitHub

- Built a production-ready MERN SaaS platform with JWT authentication and a clean, modular backend architecture.
- Integrated the Clipdrop AI API through an Express backend, with MongoDB-based credit tracking for AI generations.
- Designed the full user flow from signup through image generation and credit management.

HealthAI - AI-Powered Medical Report Analysis

GitHub

- Built a full-stack MERN application for secure upload, processing, and analysis of medical reports (PDF/image) using Google Gemini AI.
- Implemented JWT authentication, Cloudinary-based file storage, and backend middleware for validation and access control.
- Hardened API error handling and response reliability for production deployment.

Career Compass - Full-Stack Career Guidance Platform

GitHub

- Built a scalable MERN application with role-based authorization for students, admins, and counselors.
- Designed MongoDB aggregation pipelines to power analytics dashboards and personalized recommendations.
- Built reusable frontend components across quiz, dashboard, and college-exploration modules.

EDUCATION

B.Tech in Computer Science & Engineering

2022 - 2026

Sir Padampat Singhanian University, Udaipur

Specialization: Cybersecurity

ACHIEVEMENTS

- Published a Springer research paper on cloud security and blockchain.
- Designed and deployed multiple production-grade full-stack MERN applications with real-world AI integrations.
